Implantable venous access ports (IVAPS), also known as Chemo Ports, are surgically implanted devices that provide long-term access to a major vein for administering medications and fluids, including chemotherapy. Inserting implantable venous access ports is a surgical procedure; proper management is essential to prevent complications.

08.15 - 08.30

REGISTRATION

08.30 - 09.45

Dr Mastura Md Yusof

Insertion of Implantable Venous Access Ports

09.50 - 11.20
